

TED ALIĞA KOLEJİ

ACTIVITY NAME: Growing with Colors

APPLICATION DATE: September 2020– June 2021

ABOUT THE PROJECT:

Colors have a direct connection to the child's development. The use of color (colored toys, colored figures, contact with the colors of nature) contributes to the improvement of motor, cognitive, reasoning, speech, hearing, among other functions.

The child's interest in colors is visible, colors are seen as part of objects, creating an association between them (the color of the clouds, the color of the car, the color of the ball, ...).

The child is completely influenced by colors from the very beginning of life, checking the same for many good years.

We will use color to stimulate the child's development and growth in a harmonious, motivating and fun way.

AIMS:

- *Have fun learning colors
- *Explore and discover colors outdoors and indoors
- *Develop imagination and creativity
- *Increase vocabulary and ways of understanding visual reality
- *Share the discoveries and learning made with the exploration of colors
- *Cooperate with partners in selecting resources and promoting strategies

WORKING PROCESS

Each month we will focus on one color and do three activities specifically with this color. These are:

Activity 1 - making a work of art in which the predominant color is the color of the month (for example making an art project with yellow)

Activity 2 - explore a song, or a poem or a story in which it speaks of the color, of an object, of an animal of the color that we are exploring.

Activity 3 - carry out an experiment, an exploration that includes elements with the color that we are exploring. (for example making fruit stamps)

These would be common activities but also allow each teacher to develop the project according to the development and interests of his/her group. Because every classroom and every teacher is different we won't do the same art projects or read the same stories. But we can share what we have done and enrich our color learning by this.

EXPECTED RESULTS

- *"Book of colors" - each partner creates a book for their class. Each page reflects one color learned.
- *Twinspace - open twinspace for color learning
- *Hold an exhibition, at school or in another space, with works of art of different colors (to include everyone, we can exhibit photographs of the partners' works of art, using a projector)

TED ALIAĞA KOLEJİ

PARTNERS OF THE PROJECT:

- Romania
- Spain
- Poland
- Turkey
- Cyprus
- Estonia
- Albania
- Portugal
- Bulgaria
- Slovakia
- Italy

A total of 35 schools participated in the project.

Age Range: 3-12 years
