

TED ALIĞA KOLEJİ

ACTIVITY NAME: Act! There is no Planet B

APPLICATION DATE: Haziran 2020- Haziran 2021

ABOUT THE PROJECT:

The main aim of the project 'Act! There is no Planet B' is to motivate the students to adopt healthy lifestyles regarding themselves as well as their surroundings, by taking part in the wide variety of activities. Those activities are united under several categories and each partner school can choose which activities shall be done within different category, depending on its resources, type of school, age of students etc.

Those categories are:

1. More natural resources, more preserving responses;
2. Start walk or bike, Earth will give you like!;
3. One-use plastic stop, recycle on the top!;
4. Plant a tree - breathe for free;
5. Smells good cooking the traditional food;
6. Two eco actions a year reduces Earth's pain and fears;
7. Yes you can! (design your own sustainable development project such as building the insect hostel, planting a vegetable garden, painting the bin for separate waste collection etc.)

AIMS:

Students will explore the natural beauty, protected and endangered species, and the different habitats of the homeland, and discuss how they can contribute to the protection of all. The main purpose of this activity will be the code of conservation of natural resources. Another goal is to motivate students to walk or ride a bike instead of using a motor vehicle. More lessons should be taken outdoors, skill polygons can be created in school gardens, etc. Students will learn the benefits of planting trees in their environment and the dangers of using disposable plastic in daily life. Old traditional recipes will be revived and students will have the opportunity to cook and taste traditional delicious dishes. Students will design or participate in some eco-actions (eg: cleaning beaches, forests, etc., collecting old paper or plastic bottle caps, building insect hostels, etc.) in order to realize that our Planet needs quick solutions to survive.

WORKING PROCESS

October - finding more partners for the project (based on previous good experience)

November - the pupils will make the presentation about their schools and the town they live in

January/March - each partner school should plan which activities shall be done within different categories (that are mentioned in the short description of the project) depending on its resources, type of school, age of students etc.

March/May - implementation of planned activities. Each school should copy at least one idea from any partner school and carry it out with their students. All the activities should be visible on the TwinSpace of the project.

EXPECTED RESULTS

Expected results are: the Code of protection of natural resources, construction of the skills polygons in the school yards, painted linen bags with educative slogans, planted trees or vegetable gardens in the school yards, international online cook book with recipes from all the partner countries, public Twinspace with the description of all the activities that were done during the project etc.
